Under the Work Programme of Year 7, the MAC committed to provide suggestions to DG MARE on topics (price structure analyses and thematic analyses). On 30 March 2023, the MAC adopted advice suggesting a study on the supply chain of the EU tuna sector within the global tuna market. On 25 May 2023, COM sent a letter of reply suggesting a narrowing of the scope and a prioritisation of the topics. At the 7 June 2023 meeting, it was agreed, as an action item, that the main interested members would develop feedback to narrow and prioritise the scope of the proposed study. Consideration	Producer Organisations	On 3 February 2023, the MAC adopted advice on awareness on the role of Producer Organisations. Under the advice, one of the commitments was to write a document "with all market measures put in place to adjust and stabilise the market in the recent crisis, including to highlight the role of fisheries POs in increasing the value of the catches via the organisation of the market, and thus limiting the impact of fish stocks resulting from an increased and stabilised income". The results were to be presented at the September meeting of the Working Group 1.
